

## Built-in Balance WES for installation in front pull-outs, regardless of the drawer frame

# ritter Built-in Balance

## WES 35 / WES 45

**perfect storage of your kitchen balance in either a drawer or a front pull-out.  
Two versions for cabinets 30 – 50 cm / 11,81 – 19,69 inches wide.**

The telescopic design enables it to be easily fitted into almost any drawer width. The balance is simply placed into the drawer, not fixed, and it can therefore be removed and used at another place (e. g. countertop) at any time. The telescopic fittings enable the balance to be fitted at the side of the drawer frame. Antislip holders ensure that it is firmly held in place.

The flat design of the balance means that there is still enough space for the drawer to be used for storing other things!

It is well suited for diabetics.

### Features

- max. weighing capacity 5000 g / 9 lb 15 oz
- can be switched between grammes and ounces
- weighing graduation 1 g / 0,05 oz
- LCD display
- taring function
