

Press Communiqué

Third shareholder is now part of the ritter team

Gröbenzell near Munich, November 2021. Leonard Lorin Schüller moves from Bosch Siemens Hausgeräte GmbH to ritterwerk GmbH to support the company's export sales department.

This means that from now on, the last co-shareholder will also be directly involved in operations on site - in October last year, the Schüller family took over ritterwerk by way of a management buyout. Previously, the company was owned by Werner Braun, who decided to sell it due to his retirement.

The household appliance manufacturer, based in Gröbenzell, has been a well-known company in Bavaria for over 115 years - what began in 1905 as a factory for knife cleaning machines is now established in the field of small household appliances such as food slicers, toasters, coffee machines, hand blenders and kettles. Many of these appliances are also available as practical built-in solutions.

Leonard Lorin Schüller is looking forward to the new professional challenges: "I will use the experience I have been able to gain in my previous position as key account manager at Bosch Siemens Hausgeräte GmbH in my new position to the best of my ability."

Klaus Rehm, ritterwerk's export sales manager, with whom Mr. Schüller will work closely together, is also pleased about the most recent addition to the growing sales team. "In the new year, Mr. Schüller and I will visit many international customers, so he can become acquainted with his operational tasks in the best way possible," says Rehm. "Naturally, he will also be present at ambiente 2022 in Frankfurt."

About ritterwerk:

ritterwerk was founded in 1905 by Franz Ritter. Since then the medium-sized company develops and produces household appliances which facilitate the everyday work in the kitchen.

The medium-sized company, headed by Michael Schüller, develops, designs and produces exclusively in Gröbenzell near Munich.

The company's philosophy 'made in Germany' not only stands for its production site in Germany. It also incorporates high quality standards, sustainability, appropriate materials as well as functional design, thus clearly following the 'Bauhaus' principles of the twenties.
