– VDE/GS, protection class 1, CE
– dimensions: width 29.0 cm height 24.5 cm
  depth 37.0 cm
– weight : 4.9 kg

Electrical food slicer serano[5]
– semi-professional slicer for your home

The serano[5] food slicer is simply perfect if you already have high quality kitchen equipment. It guarantees the best results for slicing bread, sausage, cheese, vegetables or fruits. As well as a high level of stability and long life span.

A special feature is the powerful but quiet 130 Watt DC motor. The duty cycle is duplicated up to 10 minutes compared to an AC motor. Thanks to the strong DC motor slicing is an easy task for everybody.

The incline of the holding plate allows a perfect slicing position for effortless slicing. In addition the easy-gliding carriage can be unlocked and removed as needed. The switch for continuous and intermittent operation ensures optimised safety.

The appliance is equipped with a serrated circular blade with a diameter of 17 cm. The large circular blade cover ensures even better slicing results.

A smooth ham- and sausage circular blade is available for every ritter food slicer.
