Built-in vacuum cleaner SES 10

Modern and functional kitchen technology.

for installation in almost every furniture front panel from 10 cm front panel height, can be retrofitted

prerequisite: fitting space > 345 mm wide

The SES 10 built-in vacuum cleaner with stainless steel panel is the efficient alternative to the awkward conventional vacuum cleaner, simply installed under the kitchen unit and always ready to use. Touch the button to activate the built-in vacuum cleaner. Any dirt swept in front of the suction opening is removed in seconds thanks to the efficient 600 Watt motor. Just 10.5 centimetres high, the device can be fitted - or retrofitted - under almost all fittings and in any panelling. All you need is a standard 230 Volt socket. The SES 10 built-in vacuum cleaner uses conventional Swirl® vacuum cleaner bags with anti-allergen filters.

Item No. / GTIN

940.000 / 40 04822 94000 7
