*The 2-year manufacturer's warranty applies to all devices sold within the European Union. Your legal warranty claims according to § 437 ff. BGB (German Civil Code) remain unaffected by this regulation. You can view the warranty conditions at <https://www.ritterwerk.de/warranty>.

amido³ food slicer – tempting design and practical functions

With its elegant silver and red look and its semi-professional design, the full metal food slicer amido³ is a real eye-catcher in any kitchen. Alongside its exceptional appearance, it also convinces with its sophisticated technical functions. The 25-degree-inclination of the food holding plate offers an optimal and comfortable slicing position so that fresh bread, juicy ham or fresh vegetables can be sliced evenly without any physical effort.

The easy-going metal carriage allows a high level of user comfort while slicing. In addition, there is almost no limit to what can be sliced thanks to the broad-surfaced metal carriage. Even cleaning afterwards is no problem – the carriage can easily be unlocked and detached for this purpose.

With the food slicer amido³, it's easy to slice foods into even slices and prepare them since the slicing thickness can be adjusted precisely from wafer-thin up to approx. 23 mm. The serrated circular blade, made from stainless steel, ensures the perfect "slice", achieving even better slicing results protected by the circular blade cover. The food slicer can be used in intermittent and continuous operation as needed.

The amido³ is driven by a 65 W eco motor which is 20 % more economical and just the same 50 % more powerful than the previous model.

High-quality materials and a perfect finish guarantee a long life span for the amido³ – an ideal device for anyone who values classy design as well as "made in Germany" technology.

A smooth ham- and sausage circular blade is available for every ritter food slicer.

About ritterwerk:

ritterwerk was founded in 1905 by Franz Ritter. Since then the medium-sized company develops and produces household appliances which facilitate the everyday work in the kitchen. The medium-sized company, headed by Michael Schüller, develops, designs and produces exclusively in Gröbenzell near Munich.

The company's philosophy 'made in Germany' not only stands for its production site in Germany. It also incorporates high quality standards, sustainability, appropriate materials as well as functional design, thus clearly following the 'Bauhaus' principles of the twenties.
