

# Kettle cavita<sup>5</sup>

[www.blauer-engel.de/uz133](http://www.blauer-engel.de/uz133)

selected design

## Details

- cordless kettle with 360° rotating base
- heat-resistant acrylic housing
- double-sided water level indicator
- safety lid with lock mechanism
- removable lime-scale filter
- covered heating element with stainless steel protector plate
- cord storage in the base with two cord exits
- four rubber feet to prevent slipping
- 70°, 80°, 95° and 100°C temperature settings with LED indicator
- overheating protection with automatic switch-off when the set temperature is reached
- boil-dry protection with automatic switch-off when kettle is empty
- automatic switch-off when kettle is removed from base
- 1.1 liter capacity
- warranty: 2 years\*, product made in Germany

## Technical features

220 - 240 Volt, 2400 - 2800 Watt  
VDE / GS, safety category 1 CE

Dimensions:  
width 22.0 cm height 24.5 cm depth 15.0 cm  
weight: 1.3 kg

## Item.-No. / GTIN

black: 635.015 / 40 04822 63515 6  
white: 635.016 / 40 04822 63516 3  
red: 635.017 / 40 04822 63517 0

Technical data are subject to change

\*The 2-year manufacturer's warranty applies to all devices sold within the European Union. Your legal warranty claims according to § 437 ff. BGB (German Civil Code) remain unaffected by this regulation. You can view the warranty conditions at <https://www.ritterwerk.de/warranty>.

## Energy saving cavita<sup>5</sup> kettle

The right preparation and, above all, the right water temperature are crucial when it comes to the optimal enjoyment of black tea, green tea and coffee. The cavita<sup>5</sup> kettle can do more than boil water. It heats it to the exact temperature you require. Unnecessary heating and cooling to the required temperature is omitted, saving energy. The water can be heated to exactly 70, 80, 95 or 100 degrees Celsius with the help of four temperature settings – simply at the touch of a button. The thermally-insulated housing offers two advantages: firstly, it protects against unpleasant burning during use. Secondly, the heated water cools more slowly through the double-walled housing.

cavita<sup>5</sup> does not just impress with its energy efficiency. It is also particularly user friendly: Whether you're a left or right-hander – with water level indicator on both sides, the filling volumes can always be seen without any problems, without it being concealed by your hand. The particularly wide-opening lid means the kettle can be filled more easily and also dried or cleaned just as easily. To prevent any irritating and unsightly limescale deposits, cavita<sup>5</sup> is equipped with a highly polished stainless steel heating plate. The smooth surface means limescale cannot adhere as quickly, and is also easier to remove if necessary.

As the water hardness depends on the region, the kettle is equipped with two metal limescale filters. The coarse-pored limescale filter should be used in very hard water. The larger pores mean the water permeability is retained for a longer period of time despite the limescale deposits. The fine-pored limescale filter should be used for softer water, so that even the smallest limescale crumbs are caught. The sharp spout edges ensure the water is poured easily without any irritating dripping.

It is often the small things that make up a practical kitchen appliance as a whole.

cavita<sup>5</sup> also fulfils all the requirements when it comes to safety: The temperature buttons are covered with waterproof film and the kettle switches off automatically when the pre-set temperature is reached. It is also equipped with protection against dry running and overheating. In addition, a safety lid, which has to be opened with two fingers to prevent any unintentional opening, and the illuminated LED display also ensure the safe handling of the kettle.

Due to its low energy consumption, its user-friendly operation and its environmentally-friendly materials, cavita<sup>5</sup> bears the "Blue Angel" environmental label, as it protects the environment by saving energy.

Together with the incomparably slim-line merido<sup>5</sup> toaster and energy-saving pilona<sup>5</sup> coffee maker, the colour-coordinated breakfast set is complete – naturally "made in Germany".

### About ritterwerk:

ritterwerk was founded in 1905 by Franz Ritter. Since then the medium-sized company develops and produces household appliances which facilitate the everyday work in the kitchen. The medium-sized company, headed by Michael Schüller, develops, designs and produces exclusively in Gröbenzell near Munich. The company's philosophy 'made in Germany' not only stands for its production site in Germany. It also incorporates high quality standards, sustainability, appropriate materials as well as functional design, thus clearly following the 'Bauhaus' principles of the twenties.
