

# Cordless hand blender vertico<sup>7</sup>

selected design

## Details

- cordless, battery-operated hand blender
- LED battery level indicator
- universal cutter made of stainless steel: standard attachment to blend most foods
- blending cup made of plastic
- three speed settings:  
approx. 12.000 rpm; 9.000 rpm; 6.000 rpm
- aluminum housing, ergonomic plastic handle
- two-finger switch-on safety system
- automatic safety shut-off in case of overloading or overheating
- warranty: 2 years\*
- made in Germany

## Technical features

Plug-in power supply unit for charging station:  
input voltage 100-240 V  
Lithium-ion-battery: 7.2 V; 2.1 Ah  
Power/wattage: 120 watts  
TÜV-Rheinland / GS, CE

Hand blender incl. charging station:  
Dimensions:  
width 15.0 cm height 44.0 cm depth 15.5 cm  
weight: 1.7 kg

Hand blender:  
Dimensions:  
width 6.0 cm height 42.0 cm depth 7.0 cm  
weight: 1.0 kg

## Item No. / GTIN

628.011 / 40 04822 62811 0

Technical data are subject to change

\*The 2-year manufacturer's warranty applies to all devices sold within the European Union. Your legal warranty claims according to § 437 ff. BGB (German Civil Code) remain unaffected by this regulation. You can view the warranty conditions at <https://www.ritterwerk.de/warranty>.

## **vertico<sup>7</sup> cordless hand blender**

Making a simple soup often is much more difficult than it sounds. Conventional hand blenders are equipped with cords that often turn out to be too short. This leaves you with no choice but to take the hot pot with its boiling contents towards the power outlet. If the cable is long enough you must be careful not to knock over all your kitchen utensils as the cable is likely to get caught by objects standing in the way. You must also make sure not to place the cable over hot surfaces.

The new vertico<sup>7</sup> hand blender guarantees absolute freedom in the kitchen with its cordless design. The lithium ion battery's operating time depends on the respective kind of food that needs to be cut. It lasts about 20 minutes while puréeing liquid or creamy foods like soups and about 15 minutes while chopping raw vegetables or while preparing doughs. The hand blender is kept in its own charging station – that way, it is always ready to hand and is recharged automatically after every use as soon as it is put away. ritterwerk has equipped their hand blender with a lithium ion battery that is gently and slowly charged without being overcharged thanks to its intelligent charging technology. This charging technology ensures a longer battery life. Should the battery ever become defective, it would not be necessary to throw away the entire blender. For the sake of sustainability, we have integrated a replaceable battery, so that customers can order a new battery and install it themselves. After use, simply put the vertico<sup>7</sup> into the charging station and keep an eye on the LED indicator signalling the battery charging status. As with all ritter products, vertico<sup>7</sup> is made in Germany and provides great material quality. It consists, for the most part, of high-quality and stable metal, while the handle is made of plastic for more comfortable ergonomics. The pins at the blender keep the food you want to chop in place in order to guarantee ideal results. The mixer unit has an open shape to prevent clogging when chopping hard foods. The simple operation of the vertico<sup>7</sup> hand blender with the tried-and-tested two-finger safety switch-on technology prevents accidental switch-on and guarantees safety. The hand blender can only be activated by pressing both buttons and becomes inactive if one of the buttons is released. The overload protection feature protects the motor and automatically switches the device off in case of overheating or blocking of the blade.

In order to be able to cope with a very wide range of foods, there is the universal cutter as the standard attachment for chopping up and puréeing of most foods. Optimal processing is achieved in the blending cup made of plastic because it is ideally suitable with its tall, narrow shape. It is also possible to use a shallow, wide container, though. In addition, the hand blender can work at three different speed settings. For the cordless hand blender vertico<sup>7</sup>, there is a whipping disk, a stirring disk, a cutting knife and another blending cup made of stainless steel available for delivery as optional accessories. The attachments are suitable for dishwashers, but this may cause the blades to become blunt.

### **About ritterwerk:**

ritterwerk was founded in 1905 by Franz Ritter. Since then the medium-sized company develops and produces household appliances which facilitate the everyday work in the kitchen. The medium-sized company, headed by Michael Schüller, develops, designs and produces exclusively in Gröbenzell near Munich. The company's philosophy 'made in Germany' not only stands for its production site in Germany. It also incorporates high quality standards, sustainability, appropriate materials as well as functional design, thus clearly following the 'Bauhaus' principles of the twenties.
